

Medical Company Regulation — India

Medical Devices Rules, 2017 (MDR 2017)

Regulation: Medical device manufacturers in India must comply with the Medical Devices Rules, 2017. The rules provide requirements relating to licensing, manufacture, quality and safety of regulated medical devices.

Sample Compliance Requirement

A medical device manufacturer must obtain the appropriate licence before manufacturing regulated medical devices and maintain the required quality-management and safety records.

Example for the ComplyAI Dashboard

Field	Example
Regulation	Medical Devices Rules, 2017
Industry	Medical / Healthcare
Requirement	Obtain the appropriate manufacturing licence
Compliance Evidence	Manufacturing licence, QMS records
Risk if not compliant	Regulatory action / product restrictions
Status	Compliant / Gap
Example Gap	Licence document missing
Recommended Action	Upload and verify the valid licence

Note: This is a simplified sample for a hackathon compliance demonstration, not legal advice. Actual compliance depends on the specific medical device, classification, activity and applicable requirements.
